

Enformion's Utility Records are a unique data set that provides access to an expanded breadth of data.

Find more contacts quickly with our new Utility One Search – a unique data source you can access immediately!

Enformion's new Utility One Search – as reported by gas, electric, phone, and other utility companies—is a unique data set that provides access to new names and up-to-date contact information, including more than 45 million consumers not found in traditional credit header data.

Included is comprehensive coverage across these service types:

- ▲ Telecommunications - Voice, Data, and Video
- ▲ Cable, Satellite, and Pay TV
- ▲ Wireless service
- ▲ Electricity/power
- ▲ Gas
- ▲ Water
- ▲ Home security

With the addition of this new data file, our database is expanded for more breadth and coverage to provide you the solutions you need. And, since utility data is updated more frequently, often 30-60 days prior, than other data sources, you can count on even more timely information from your searches.

Features & Benefits

- ▶ Access to new data sources containing phone numbers on millions of consumers that you won't find by using credit header data alone.
- ▶ Our Utility File contains:
 - ▶ 240M+ unique consumers
 - ▶ 700M+ records
- ▶ Access to our entire database with 43B+ records from over 6,000 sources
- ▶ Lower cost solution without sacrificing quality
- ▶ Customized solutions tailored to your specific needs
- ▶ Perfect for high volume needs through batch processing or API
